Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/19/07 has been entered.

2. The declaration filed 3/19/07 has been considered. Applicant's arguments are not further addressed in view of the amendments to the claims.

Election/Restrictions

3. Claims 13-20 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 1-12, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 4/7/06 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

4. The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the compositions set forth in allowed claims 13-20, nor the methods for using them. Although the prior art generally suggests making primers and probes to Mycobacterium 16S rRNA sequences, and provides the a full length 16S rRNA sequence of which the primers in the claimed compositions are fragments, the prior art does not teach the specific combination of two primers set forth in the claims and required in each of the allowed compositions, kits and methods. In particular, it is noted that instant SEQ ID NO: 24 includes a hairpin sequence which would have discouraged one of skill in the art for selecting it for use as an amplification primer due to the secondary structure and it's possible interference in priming. Further, the allowed claims are drawn to describe the claimed oligonucleotides using "consisting of" language, and the prior art does not suggest the exact combination of primers claimed and used in the method claims, although it generally suggests making primers and probes. Thus, the claims are free of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
